

ADMINISTRATION REPORT

OF THE

FOREST DEPARTMENT

OF

H. H. the Nizam's Dominions,

BY

F. A. LODGE, C. I. E.,

CONSERVATOR OF FORESTS,

FOR THE

FASLI YEAR 1323.

(4th October 1913 to 5th October 1914 H. D.

Forwarded with letter No. 471, dated 3rd May 1915.

(WITH ORDERS OF GOVERNMENT.)

Secunderabad:

CHEEKOTY VEERUNNAH & SONS--GOVT. PRINTERS.

1915.

**Progress Report
OF
FOREST ADMINISTRATION
IN
His Highness the Nizam's Dominions
For the year 1923 Fasli, (4th October 1913 to 5th October 1914.)**

CHAPTER I.—CONSTITUTION OF STATE FORESTS.

Reserved Forests.

1. No forests have as yet been constituted "Reserved Forests" in accordance with the procedure laid down in the Forest Act of 1809 Fasli, though several have been gazetted as "Protected Forests." It is proposed to await the passing of the revised Forest Act, before constituting any areas reserved forest.

Protected Forests.

2. The area of protected forest which term includes forests declared reserved prior to the existence of any Forest Act at the close of the year was 7,226.21 square miles, against 8,034.98 at its commencement. The decrease is almost entirely a paper one, and does not affect the actual forest areas. It will be observed that in Form 2 the forests of Warangal, Kareemnagar, Lakshattipett and Nirmal Divisions have been broken up into a large number of blocks, corresponding to natural divisions on the ground; most of these blocks, each of which will form a separate reserve, have been demarcated on the ground, and approximately plotted on the Survey of India $\frac{1}{2}$ inch maps; in a few cases the boundary has been traversed and plotted; the figures showing the forest area in the first three divisions represent approximately the actual areas demarcated as forest in nearly all of the large extents of country covered by the rather vague notifications; they are not absolutely correct, but are much more nearly so than the figures hitherto shown. The Nirmal figures have not been corrected, and the information for the remaining divisions is still so incomplete that last year's figures are left standing.

The decrease in area is most marked in Lakshattipett Division, where 508.38 square miles of cultivated and cultivable lands, also possibly some uncultivable areas, have been left outside the boundary lines cut on the ground.

3. The Aurangabad figures are very deceptive as much of the area shown as protected has been given on putta during recent years, but the figures include all such lands lying within the original boundaries of the reserves. The actual forest area is too small to meet local requirements, and it is hoped that the grant of puttas inside protected forests will no longer be allowed pending final demarcation of the areas to remain under forest. The effect of the grant of puttas has been to leave the Forest Department in charge of long narrow strips of hill slopes with cultivation above and below; such areas are difficult to protect, and to work remuneratively. The Bawni-Pangri and Gotan protected forests with an estimated area of 14,950 acres were added to the Aurangabad area during the year.

Open or unclassed Forests.

4. The area of open forests shown in Form 3 shows a decrease of 15,355 acres as compared with the 1822 Fasli figure; this is due to the transfer of two blocks in Aurangabad to Form 2 and to the exclusion of 396 acres given on putta in Gulbarga. The figures in this return are just as unreliable as those in Form 2, as large portions of the so-called open forests are actually held on putta. Efforts will be made to obtain more nearly correct figures for the 1824 Fasli return.

Forest Settlement.

5. No Forest Settlement work was carried out during the year. In fact no forest settlement as understood in British India appears to have been carried out at any time since the passing of the existing Forest Act. It is hoped that the revised Act will shortly be passed and Forest Settlement will then be taken in hand seriously.

DEMARCATION.

External Demarcation.

6. The term "internal demarcation" has been used in past years in a misleading manner; its real meaning is the demarcation of enclosures in forests set aside for reservation or protection, but it has been used to cover alterations, of external boundaries made in order to exclude land fit for cultivation from the forest area. For the Fasli under report it has not been possible to entirely separate the two, but from next Fasli, internal demarcation will refer only to the demarcation of enclosures in the forests. Line clearing is still chiefly carried out by the villagers, and is said to be "free of charge," but actually the villagers take all the timber out on the lines for their own use. As a result the lines are cleared to a greater width than necessary, and there is no record of their cost.

7. The enclosures of the Anapreddipally Reserve have been out, and these lines together with the enclosure boundaries of Yellandu Reserve covering a length of 263 miles were kept clear during the year.

8. *New work.* In the Kareemnagar Division, 28.26 miles of outer boundaries of the Siroilla protected forest area were cleared at a cost of Rs. 68-1-0.

In the Lakshattipett Division, 19 miles of outer boundary lines only were cleared, at a cost of Rs. 122-15-0.

In the Nirmal Division, very satisfactory progress was made during the year and a total length of 222.66 miles of outer boundary lines were cleared. An expenditure of Rs. 51-2-0 only has been shown in the statement as disbursements made after the close of the year have not been included.

Nearly 46 miles of new boundaries were cleared during the year in the Nizamabad Division, without cost, as the Assistant Conservator states, but very probably the timber cut on the lines was given as compensation for the work done.

15 miles of outer boundaries in the Medak Division cost Rs. 157-9-4 or Rs. 10-8-1 per mile.

In the Mahbubnagar Division, 80 miles of boundary lines were cleared without cost, that is, the produce out on the lines, which was of inferior fuel, was given in compensation for the work done.

In all the divisions, therefore, the total out-turn of new work amounts to 360.92 miles leaving 951.73 miles of boundaries still undemarcated. The increased length of boundaries left to be demarcated as compared with last year is due to the reconstruction of the forest areas into smaller compact blocks.

9. *Repairs* to the already existing boundary lines were carried out in all the divisions, totalling 1,562 miles with very little expenditure, as generally all lines are kept clear by the village ryots in return for the concessions enjoyed by them.

Internal Demarcation.

10. In the Warangal Division, the enclosures of the Anapreddipally reserve have been out, and these lines together with the enclosure boundaries of Yellandu reserve covering a length of 263 miles were kept clear during the year.

11. The reconstruction of the old forest areas into a number of smaller compact blocks tends to do away with the necessity of including enclosures of cultivation &c., inside the reserve.

Forest Surveys.

12. The old Forest Survey establishment which appears to have produced no results was dispensed with in 1822 Fasli. On the 1st Ardibebist a retired officer of the Survey of India was engaged to make a detailed survey of the Yellandu reserve; it took some time to collect surveyors, and to obtain the necessary survey instruments, meantime the survey officer prepared (under the instructions of the Conservator) a preliminary forest map of the whole of the dominions on the scale of one inch to 8 miles; this map is now being printed and will be very useful for general reference. For the detailed survey of Yellandu reserve old G. T. S. stations were cleared and by the close of the year observations had been taken from 24 hill stations fixing over 80 detailed points. Work

was delayed by the exceptionally heavy and lengthy monsoon, and plane tabling was not commenced until after the close of the year.

13. In each district a surveyor-draftsman was attached to the Assistant Conservator's office and much useful work has been turned out in the way of surveying and fixing disputed boundaries, reducing village maps so as to form rough maps of reserves, traversing boundary lines, etc.; but the information given in divisional reports does not suffice for a tabulation of the results. In Mahbub-nagar division, a great deal of the surveyor's time was occupied with the survey of blocks in the Lingal Settlement for Criminal Tribes.

CHAPTER II.

MANAGEMENT OF STATE FORESTS.

Regulation of Management. Preparation and control of working plans.

14. Simple working plans have been framed for small areas in Chincholi and Narsapur forests of Nirmal Division and coppice fellings have been commenced.

15. In Gulbarga a provisional working plan for the Rasnam reserve is in force, and coupe XIII of 525 acres was auctioned for Rs. 9,100; the purchaser is supposed to coppice everything except the standards; the divisional report is silent regarding the manner in which the work was done and it is to be feared that the purchaser takes out what he likes and leaves the rest. The grant of permits for timber from reserves was put a stop to during the year, as a first step towards saving the forests from destruction; the market is at present supplied from the results of fellings on lands given on *putta*.

16. Even where coupes are established, the market value of the produce cannot be realised nor can all the produce be sold so long as permits at ridiculously low rates are issued to all comers, who can make dead wood and remove it in large quantities.

17. In several divisions it is reported that fellings on the "selection system" are in force; this is a misleading statement, as the only system (?) is to allow the permit holders to select what they want with the natural result that all the good timber is taken out of the forests and the rubbish left to cumber the ground. The general method of working the forests is by the permit system, which is a sure method of destruction of forest growth, but until the rules regarding concessions to villagers and unlimited issue of permits are modified it is impossible to improve matters. As an example of this, in Nizamabad where an attempt at coupe felling was made the local villagers insisted on grazing their cattle in the felled area, stating that their payment of cess entitled them to graze everywhere and the Tahsildar of Nizamabad is said to have supported their claim and told them that they could graze their cattle in the felled area. The want of system is largely due to the fact that no forests have been reserved yet, and spasmodic efforts to open coupes without having control over the forests, in order to show some "real forest work," are foredoomed to failure.

COMMUNICATIONS AND BUILDINGS.

Roads.

18. Practically nothing has yet been done to open out the forests and facilitate transport by means of roads; this is chiefly due to the fact that no systematic working of the forests having been undertaken the need for export roads has not been felt. In Aurangabad District, the Gowtala cart track and the Mainsghat and Antoor bridle paths of Kannad reserve were repaired, the funds having been supplied in the previous year by the Local Fund Department. These tracks are reported to be "in pretty good condition except in a few places where hill torrents have done damage;" evidently the stream crossings require improvement.

BUILDINGS.

(Form 8, and 8-a.)

19. Warangal complains that all the Public Works Department terraced tools became water-logged and leaked badly during the rains.

20. Lakshattipett reports that "complaints poured in from almost every office regarding the buildings erected in the last two or three years by the Public Works Department. Every one of them has not been provided with compound. Most of them leaked badly. None of them appeared to have been even whitewashed."

21. The construction of the Divisional Offices of Gulbarga and Mahbubnagar was in progress during the year. Details of the works under construction by the Public Works Department are shown in Form No. 8 of the Appendix.

22. Form (8-a) shows that only Rs. 29-12-0 were spent on petty repairs to buildings during the year under report

PROTECTION OF FORESTS.

General Protection.

23. The number of forest cases pending at the commencement of the year was 4,780; the new cases of the year numbered 6,506 as against 5,701 in the preceding year; 6,563 cases were disposed of leaving 4,723 cases pending at the close of the year.

24. The cases are practically all disposed of without taking action in the courts, and though this saves the courts a great deal of work, it is doubtful whether the procedure is in the interests of justice; the cases are decided by Forest Officers who naturally have a bias towards their own side, and it is probable that the innocent frequently suffer with the guilty; against this however must be set the very light punishments which Forest Officers have power to inflict; in the case of theft of timber, only double the royalty may be collected and the timber then has to be released; in grazing cases, double the grazing fee is the limit. In places where timber is scarce, double the royalty is less than the local value of the timber and people steal boldly and pay the penalty willingly; the same is the case with grazing. To be deterrent, punishments must be more severe, but very few Forest Officers could be entrusted with the power of inflicting heavy punishments.

25. Only 7 new cases were taken to Court during the year; the reason for this is principally that Forest Officers are ignorant of the law, and incapable of putting up cases properly; consequently they assert that the courts will not convict, to which the magistrates naturally reply that they cannot convict unless the charges are proved; Forest Officers therefore dispose of as many cases as possible themselves, and avoid taking cases to court. The disposal of court cases takes a long time; at the commencement of the year, 3 cases were pending; and as stated above, 7 new cases were taken to court during the year; out of these 10 cases only four were disposed of leaving 6 pending at the close of the year two of them dating from 1822 Fasli. It is satisfactory to note that convictions were obtained in all the cases disposed of. The old pending cases belong to Warangal division, and one of them appears to have been transferred to the Police for prosecution, in connection with the Game Laws.

26. The increase in the number of new cases is due to the increase in the number of forest guards. Many of the cases refer to offences committed in unreserved lands, and it is hoped that such cases will gradually diminish in number, though an increase in the number of offences committed in reserves must be expected, owing to the guards spending more of their time in the reserves and less in the villages.

27. The incidence of fines per head varied from Rs. 4-10-7 in Warangal to Rs. 1-5-7 in Laksbattipett and Medak, and the total amount of fines realised was Rs. 34,597 against Rs. 33,427 in the previous year.

28. The number of cases pending at the close of the year shows a very slight decrease over the figure of the previous year, and is unsatisfactorily large. This is partly due to the difficulty experienced in collecting fines levied under the rules by Forest Officers.

29. The large number of cases withdrawn in Warangal and Nizamabad shows that careful enquiry is made into the cases, but also casts suspicion on the conduct of the subordinates who reported so many unproveable cases. As the area of ranges decreases, Range officers will be better able to enquire into the cases reported by their subordinates.

Protection from fire. (Form 10).

30. Fire protection is still in its infancy; the areas under protection form a very small percentage of the total forest area, and the protection in some places is nominal. In Warangal, Kareemnagar and Aurangabad divisions fire lines are cleared and burnt, but unless the Assistant Conservators can personally see to the work it is likely to be badly done. In Warangal the protection of one block of 86½ square miles cost Rs. 910-15-6 or Rs. 10-14-0 per square mile; if this sum is properly spent protection should be perfect; the only fire reported was a small one which started during line burning and was soon extinguished. In Kareemnagar 78 square miles were protected at a cost of Rs. 755 or Rs. 9-10-10 per square mile. In Aurangabad an attempt was made to protect 20 square miles; one fire occurred, burning a quarter of a square mile; the fire was caused, by a Police employee firing a gun in the protected area; the police authorities let the man off with a warning. In the remaining districts fire protection was only nominal; there are extensive tracts of forest in which protection is not required owing to the absence of grass and dead teak leaves, and in course of time these areas will be placed in a class by themselves.

Protection from cattle. (Forms 11 and 12).

31. Practically there is no protection from cattle, and the forests are suffering from heavier grazing than they can support without deterioration. Under the existing rules every ryot and every house owner is entitled to free grazing for a large number of cattle and the grazing possibility of the forests has not been taken into consideration; in addition to these local cattle there are vast herds of nomadic cattle belonging to Lambadas which overtax the existing forests, and owing to the great extension of cultivation in recent years the number of cattle is increasing while the forest area available for grazing is decreasing. Until the grazing is restricted to the capabilities of the forests it is hopeless to expect good natural regeneration and improvement of existing growth. The cattle having eaten all the grass become browsers, and eat down young growth, while the graziers carry on the work of destruction by lopping trees to provide fodder for their cattle.

32. The system of levying a grazing cess in return for which ryots are entitled to graze their cattle anywhere makes control of grazing in reserves impossible, and encourages ryots to keep an unnecessarily large number of cattle, as the cess remains the same whether the payer owns two or forty-two head of cattle.

33. Form 11 shows the areas open and closed to grazing; the forest areas do not tally with those shown as existing at the close of the year in Form 2, because the alterations shown in that form only took effect at the end of the year. The area closed to grazing throughout the year was half per cent of the total forest area. As systematic working extends the percentage closed may be expected to rise steadily up to 20 or 25 per cent.

34. The number of cattle grazed on payment is shown in Form No. 12 as 9,33,352 against 3,82,082 in the previous year, and the revenue from fees as Rs. 8,57,785, against Rs. 1,79,313. The following statement compares the figures district war:—

District.	Fees received in		Increase or decrease.	Percentage of increase or decrease.
	1322 F.	1323 F.		
Warangal 30,849	... 1,12,907	+ 73,058	+ 183-3
Kareemnagar 21,531	... 71,916	+ 49,785	+ 231-2
Lakshnitpott	... 31,015	... 37,464	+ 6,449	+ 20-8
Nirmal 30,069	... 27,795	- 2,274	- 7-6
Nizamabad 2,410	... 34,194	+ 31,784	+ 1,318-6
Mahbubnagar 47,932	... 42,842	- 4,490	- 9-5
Nalgonda 1,976	... 25,408	+ 23,427	+ 1,185-6
Aurangabad 2,861	... 1,592	- 1,269	- 44-4
Gulbarga 2,269	... 4,172	+ 1,903	+ 83-9
Medak 99	+ 99	...

35. These violent fluctuations show either great irregularity in collecting revenue, or the introduction of some new system; actually both factors apply. Thus in Warangal the revenue includes Rs. 22,329 grazing cess realised in 1322 Fasli but only credited in 1323 Fasli; the correct figures for purposes of

comparison should be Rs. 62,278 and Rs. 90,578, the actual increase being Rs. 28,300 of which Rs. 24,571 came under departmental collection and Rs. 3,729 under grazing cess; the increase under departmental collection is due to the levy of higher fees on foreign cattle.

36. Similarly in Kareemnagar Rs. 26,422 represents cess of 1822 Fasli credited during the year under report, so the figures should be Rs. 47,953 and Rs. 44,894, showing actually a small decrease in revenue.

37. In Nizamabad the revenue includes Rs. 24,158 under grazing cess realised in 1821 and 1822 Fasli, details of which were only received from the Revenue Authorities during 1823 Fasli.

38. In short the figures included in the Divisional reports will not be found to tally with actual treasury receipts, as they are based on reports received from revenue officers some of which relate to previous years, and they omit the revenue of any portion of the current year regarding which no revenue department returns have been received. There is apparently no check between forest report and treasury figures, and the figures given in Divisional returns are valueless for purposes of comparison.

39. Regarding the number of cattle grazed on payment the returns are unreliable; for example Nizamabad shows 2,704 animals grazed, while the revenue is Rs. 34,195 or nearly Rs. 13 per head; the grazing revenue is largely realised in the form of a cess on land revenue, and details of the actual number of cattle grazed are unknown; the return is therefore valueless.

SYLVIICULTURE.

(a) Natural reproduction.

40. Owing to unusually good rains, natural reproduction was exceptionally good everywhere except in Mahbubnagar. In the fire protected areas of Warangal and Kareemnagar divisions which are closed to grazing during the fire season, the effects were very marked; in the rest of the forests a great deal of the seedling growth was grazed, browsed and trampled out of existence. In his recent tour the Conservator was much struck with the excellent natural reproduction of teak in the Pakhal and Mulug reserves, and by its absence in the Lakshntipet, Nirmal and Nizamabad forests where the soil is poor and the grazing incidence heavy. Coppice reproduction is reported to be excellent in all coupes closed to grazing.

41. Bamboo seedling thickets are extensive in Arsikota and Kawa reserves where the bamboo seeded a couple of years ago.

(b) Artificial reproduction. (Form 78.)

42. No new work was undertaken. The sowings of teak, sandal, khair and bijasal made at Phulmari (Aurangabad Division) in the previous year failed; of the babul sown at Parbbani in 1820 and 1821 Fasli, none survives. The remaining plantations in Aurangabad district are chiefly failures, for though a few plants still exist they are so scattered that they cannot be called plantations; the best areas are:—

Bidkingao Rmnah planted in 1818-19 Fasli, where the plants are now 3 feet high at intervals of 10 to 15 yards, or exist in groups in depressions.

Sadar Bazar, Jalna reserve, planted in 1817 Fasli, plants reported to be "pretty dense" and from 2 feet to 6 feet high.

Ghotan, Jalna Taluk; 12 acres cleared of prickly pear and sown with babul in 1822 Fasli; numerous seedlings reported, in spite of the area being grazed over.

43. From Gulbarga it is reported that all the old plantations are doing well except 16 acres of Bamboo in Kodangal taluk, which died during the year.

(c). Operations for improvement of the growing stock.

44. None undertaken.

(d). Experiments.

45. None undertaken.

5. EXPLOITATION.

(a). SYSTEM OF MANAGEMENT.

(i). Major Forest Produce.

46. With the exception of very small areas in Nirmal and Gulbarga where regular felling coupes have been worked, the supply of timber and fuel has been met by the issue of permits, or by the sale to contractors of certain areas known as coupes, in which the contractors fell what they like and leave what they like; steps were taken during the year to put a stop to these haphazard fellings in reserves, and no fresh contracts were entered into; the felling of reserved trees has been limited to unreserved areas, except in the case of contracts already in force. But free removal of "gairee" timber from reserves still continues in all forests except Yellendu reserve where the villagers have now been limited to the areas excluded from the reserve. The removal of firewood, wrongly called dead, still continues, and where dead wood does not exist it is manufactured by surreptitious fellings.

(ii). Minor Forest Produce.

47. It was proposed to transfer the control of Gulbarga stone quarries to the Mining Department, but as some time was required by that department in order to make necessary preparations for control of the quarries, it was decided that the transfer should only take place at the end of 1324 Fasli. No alteration was made in the existing system of the collection of other items of minor produce.

(b). AGENCY OF EXPLOITATION.

(i). Departmental collection. (Form 16).

48. There was no departmental collection, and the only item which falls under this head is the paper stock of timber remaining from old departmental operations. The balance on hand and at the commencement of the year was valued at Rs. 7,103; with the sanction of Government Rs. 949 of this was written off.

(ii). Purchasers.

(a). TIMBER.

49. The removals of green timber from Government forests compared with those of the preceding year were as follows:—

						1322 Fasli.	1323 Fasli.
RESERVED TIMBER.							
Cubic feet	1,81,234	1,62,982
Running feet	7,31,899	9,22,342
Poles	5,89,144	6,47,490
Miscellaneous (No.)	2,62,098	3,15,429
GAIREE TIMBER.							
Cubic feet	8,085	11,169
Running feet	54,336	74,612
Poles	57,200	77,685
Miscellaneous	42,544	1,30,721

50. There was a decrease in the quantity of large reserved timber and an increase under all other items; the decrease is due to the reserves being closed against haphazard fellings; the removals of reserved timber practically all took place from unreserved lands. The increased out-turn is most marked in Nizamabad and Medak divisions and is presumably due to the sub-division of the Nizamabad district, resulting in two Assistant Conservators being available where in former years only one existed. There is also a marked increase in Aurangabad which the Assistant Conservator states came entirely from small scattered and isolated areas of open forests surrounded by cultivation. Only two divisions show a decrease, viz., Karimnagar and Mahbubnagar, and in both divisions the decrease is attributed to the closure of the reserves to fellings.

51. The balance of timber removals is best expressed in rupees, and the comparison with the figures of 1322 Fasli is as follows:—

	1322 Fasli.	1323 Fasli.
	Rs.	Rs.
(1) Dead and fallen timber from Government Forests	18,951	9,367
(2) Timber removed from Ijara and Bampur lands	41,039	56,384
(3) Do. from old putta lands	52,948	21,781
(4) Do. from new putta lands	1,11,930	1,18,794
(5) Do. from areas under tanks and other large areas given for cultivation.	17,073	18,284
(6) Timber removed from boundary lines	...	479

The decrease under (1) is due to contracts not having been given in reserved forests.

The increases under (2), (4) and (5) are the natural result of the extension of cultivation, while the decrease under (3) is due to the time limit fixed for the realization of tree value on old putta lands having been reached; the revenue is mostly arrears of the previous year.

(b) *Firewood.*

52. Firewood is still removed free of charge on such an extensive scale that it does not yield to the State ten per-cent of the revenue which it is capable of producing. The term "green firewood" is apparently unknown, and all firewood is supposed to be dead wood except in Raichur district where in previous years a supply of green fuel was made to the local Gold Mine.

53. The out-turn of fuel on payment from Government forests is shown below:—

Division.	1322 Fasli, Cart loads.	1323 Fasli, Cart loads
Warangal	18,973	23,741
Karemagar	14,491	26,269
Lakshattipett	51,863	77,968
Nirmal	33,623	53,701
Nizamabad	20,253	{ 17,449
Medak	...	4,632
Mabbulnagar	11,271	18,855
Nalgonda	4,428	5,357
Aurangabad	18,022	11,022
Gulbarga	7,151	6,603
Total	1,79,180	2,45,497

The increase is general except in Aurangabad, whence no explanation of the decrease has been received, and Gulbarga where it is due to the Hutt Gold Mining Co., burning coal instead of wood.

(c) *Minor produce.*

54. The revenue from bamboos, realized almost entirely by the lease of bamboo blocks to contractors was Rs. 38,048, against Rs. 36,856 in the preceding year. It is surprising that there should be an increase as the bamboo has recently seeded over extensive areas, and the supply is much restricted. The major portion of the supply comes from Warangal (Rs. 15,853), Lakshattipett (Rs. 11,304) and Nirmal (Rs. 6,158).

55. Grass and grazing realised Rs. 3,81,889, against Rs. 1,98,731 in 1822 Fasli. Under "protection from grazing" (paragraphs 35—38) it has been shown that this alarming increase is due largely to the inclusion of figures relating to the previous year representing the grazing cess collected by the Revenue Department.

56. The remaining items shown in Form 15 are small and do not call for any remarks, but it may be mentioned that a permanent fall in revenue from leaves may be expected, as the ebony leaf cigarette is being replaced by the cheap American article.

(d) *Rights and Privileges.*

57. Where every ryot is entitled to timber for house building and agricultural purposes, and fuel for domestic consumption and where the control of the

forests is so imperfect that free removals can be and are made without even the formality of obtaining free permits the figures based on the value of free permits issued must be very much below the figures representing the actual removals.

According to these unreliable figures the value of timber and fuel removed under this head amounted to Rs. 36,123 in 1322 Fasli and to Rs. 47,166 in 1323 Fasli; the figures would probably be more correct if they were multiplied by ten.

(e) *Free Grants.*

58. These represent special grants for private or public or religious purposes and include timber, fuel and building stone; in 1322 Fasli their value amounted to Rs. 1,120 and in 1323 Fasli to Rs. 671.

59. The only other point to note in connection with removal by purchasers is the large amount of work involved; in 1322 Fasli the total number of applications dealt with was 73,684 and in 1323 Fasli, 76,389. This represents over 200 applications every day of the year to be dealt with by a very small staff. It is hoped that the introduction of systematic working will in time largely decrease this branch of the Forest Officers' work.

(f) *Out-turn and sources of Forest Produce.*

60. Owing to the form in which the out-turn is given in the returns it is not possible at a glance to get an idea of the total quantity of produce removed from the forests annually, but in order to get some idea, it is proposed to adopt the following factors of conversion.

4 running feet	=	1 cubic foot.
8 poles	=	1 cubic foot.
2 Miscellaneous	=	1 cubic foot.
1 Cart-load fuel	=	20 cubic feet.

On this basis the total out-turn of wood amounted to 6,456,036 cubic feet equal to a solid block of wood 148 feet high covering an acre of ground.

61. The out-turn of minor produce is only recorded in rupees and cannot be converted into any measure of capacity; the amount realised was Rs. 4,67,767, against Rs. 2,83,237 in 1322 Fasli, but the figures are misleading, for reasons given in connection with the grazing revenue.

CHAPTER III.

FINANCIAL RESULTS.

Revenue.

62. The gross revenue for the year was Rs. 1,181,563 made up of the following items:—

	1323 Fasli.	1322 Fasli.
Major produce ...	6,21,688 = 55 per cent	... 6,23,738 = 68 per cent
Minor produce ...	4,67,767 = 41 per cent	... 2,46,381 = 26 per cent
Miscellaneous ...	42,108 = 4 per cent	... 44,785 = 6 per cent

63. This does not include Rs. 357 on account of attached Jaghirs or Rs. 5,909 deposits of Jaghirs (Dastgarden), nor Forest revenue collected by Revenue Officers, as details have not been received from all districts; but even without these items the revenue breaks all previous records. This is not a matter for congratulation, as the forests for several years to come require money putting into them, and the amount taken out will have to be much diminished; no repetition of such figures can be expected for the revenue has been artificially raised by the inclusion of grazing revenue which actuallyly belongs to the previous year, and by the large sums realised in payment for trees on dharkhast lands, a source of revenue which must diminish before long, as the supply of cultivable land and of cultivators is not inexhaustible.

64. Warangal is the largest revenue producing district, owing not only to the intrinsic value of its forests, but also to its favourable position with regard to the railway which facilitates the transport of produce to market.

Expenditure.

65. In past years expenditure on Conservancy has been shown in a lump sum; this year Form 19 has been arranged according to the budget sub-heads

used in British India; this not only enables the expenditure to be more easily analysed, but also facilitates comparison with expenditure in British Provinces.

66. A perusal of the return gives the impression that very little work is being done, and this is actually the case; the establishment is so inadequate, and its duties outside the forests are so numerous that very little has yet been done to develop the forests. There is no establishment charged to works, to check the extensive removals on permit; the whole of this police work falls on the regular establishment and occupies much of its time; roads and buildings are non-existent, except such major buildings as are erected by the Public Works Department. Even demarcation shows a very small expenditure, but this item is misleading, as many hundreds of miles are cut and kept clear by the villagers or by contractors who receive as payment the growth cut on the lines; a system which has now been put a stop to.

67. The heavy item under survey is due to the formation of a survey party under a retired Survey of India Officer, the results of whose work will be shown in the following year's report. Fire protection is in its infancy and the expenditure under this head may be expected to increase rapidly.

68. Under establishment the expenditure amounted to Rs. 2,79,952 against Rs. 2,57,573 in the preceding year. The increase was due to a general increase in the strength of subordinate establishment, coupled with the formation of a new division in Medak, and partly counter-balanced by there being no expenditure on account of a Forest Advisor, though the savings thus effected were diminished by the appointment of a Conservator from the British Service.

69. The figures of the main heads compared with those of 1822 Fasli are:—

Head.		1822 Fasli.	1823 Fasli.
Salaries..	2,10,674	2,34,948
Travelling allowances	15,585	19,359
Contingencies	33,313	25,647

The decrease under contingencies was due to smaller purchase of tents.

70. Form 20 shows that of the total revenue 58·25 per cent was realised from protected forests and 41·75 from open forests, but these figures are not very reliable as in many cases the distribution is made by rule of thumb and the figures could be manipulated to show very different results.

OUTSTANDINGS OF FOREST REVENUE (FORM 21).

71. The outstandings increased during the year from Rs. 1,83,127 to Rs. 1,99,218; of the amount outstanding at the commencement of the year only Rs. 42,252 were collected. This is unsatisfactory, but the accumulation of outstandings has been going on for many years, and now includes sums which have been outstanding for upwards of 30 years and are absolutely irrecoverable. Steps are being taken to reduce this paper figure.

LIABILITIES AGAINST THE DEPARTMENT.

72. Rs. 81,144 are carried forward as "Dastgardan" i. e., revenue payable to Jaghir and other private estates which are under attachment.

CHAPTER IV.

ADMINISTRATION.

73. Mr. E. A. Partridge was in administrative charge until the 5th Farvardi 1823 Fasli, when he was relieved by Mr. F. A. Lodge, appointed on retirement from the British Service. During the time Mr. Partridge held charge he spent 37 days in camp; his tour was cut short by having to return to head quarters to hand over charge to Mr. Lodge, who did no touring during the year, being fully occupied with studying the conditions of

work and the system in force. The touring done by Divisional Officers was as follows:—

Name of Officer.	Division.	Days spent on tour.	Remarks.
Mr. R. U. Farnell	Warangal	96	
Mr. M. M. Ali Beg	Khamam	92	Of these 58 days were spent in Gulbarga Divn.
Mr. F. C. Edwards	Kreemnagar	65	
Mr. Mirza Abbas Beg (Offg.)	do	60	
Mr. Krishnaji Ganesh Jawodekor	Lokshattipett	15	
Mr. G. S. Bordey, (Offg.)	do	188	
Mr. L. H. Somvay	Nirmal	144	
Mr. Ahmed Mohiuddin	Nizamabad	162	
Mr. B. Bangaswamy Aiengar	Medak	144	
Mr. Ghouse Mohiuddin	Mahubnagar	167	
Mr. Mirza Mahomed Ali	Aurangabad	156	
Mr. Gopal Kishan Rao	Gulbarga	47	

74. On the whole the touring and work of Divisional Officers was satisfactory, but more energy might be displayed by one or two of them.

75. Mr. Mahomed Ali Beg after passing from Oxford was appointed in the Forest Department on 24th Farwardi 1323 Fasli. As it was intended to form a new Forest Division in Warangal he was sent to assist the Assistant Conservator of Forests there and to make himself acquainted with the forests. Later during the recess season he officiated for the Assistant Conservator of Forests, Gulbarga, while the latter was on leave from 6th Tir to 5th Sharewar 1323 Fasli.

76. The following statement shows the periods of absence on leave of the Assistant and Sub-Assistant Conservators.

Name.	Grade.	Description of leave.	Total period of leave.	From.	To.
			M.	D.	
1. Mr. Krishnaji Ganesh	A. C., 1st Grade Rs. 350, Lankshattipott	Sick Leave.	9	2	29th Bahman.
2. Mr. F. C. Edwards	A. C., 2nd Grade Rs. 300, Kreemnagar.	Privilego.	2	0	24th Isfandiar.
3. Mr. L. H. Somvay	A. C., 2nd Grade Rs. 300, Nirmal.	do	1	0	15th Sharewar.
4. Mr. Gopal Kishan Rao	A. C., 2nd Grade Rs. 300, Gulbarga.	Sick Leave	2	16	1st Azur.
5. Mr. G. S. Bordey	Sub-Assistant, Rs. 150, Ramayempatt.	Private Leave.	3	0	1st Azur.
6. Mr. Syed Jamaluddin	Sub-Assistant, Rs. 125, Nanded.	Sick Leave.	1	15	1st Tir.
7. Mr. K. Ramiah ...	Sub-Assistant Rs. 100, Special duty, Warangal.	Privilego.	1	22	9th Mohar.

77. Mr. Partridge has been of great assistance to the Conservator owing to his thorough knowledge of the Dominions, and the interest he takes in his work.

78. The Conservator's acquaintance with the field work of the Divisional Officers having only commenced in 1824 Fasli he refrains from remarking on their work during 1823 Fasli, but will deal with it in some detail in the next year's report.

79. The following statement shows the casualties which occurred and the summary of punishment awarded during the year:—

Rank.	Deaths.	Resignations.	Retirements.	Dismissals.	Reductions	Suspensions.	Fines.	Total.
Rangers ...	1	...	1	3	5
Dy. Rangers,	1	4	5
Foresters	1	...	1	5	7
Forest-Guards	2	21	4	50	48	120
Defadars	1	6	7
Clerks, ...	3	3	1	1	31	89
Paons, Khallasies &c.	3	1	...	3	1	3	8	19
Total ...	10	1	1	29	6	55	100	202

Offices.

80. In the Conservator's Office Mr. Shrinivas Rao, Personal Assistant to the Conservator, has maintained order and worked hard and satisfactorily; the Manager Mahomed Khwaja also deserves mention for good work. The English Branch of the office is overworked and needs strengthening.

81. There appears to be a great deal too much office work in all offices; this is largely due to the amount of work connected with forest growth on unreserved lands which should rapidly diminish as reserved forests are constituted. The Divisional Officers report favourably on the work of their head clerks, but most of them complain of the great amount of office work to be got through.

CHAPTER V.**GENERAL REMARKS.**

82. The following statement shows the extent of Forest lands given out for cultivation during the year. In Nirmal lands inside protected forests are reported to have been given on putta by the Revenue Department, but this was put a stop to before the close of the year:—

Items.	No. of villages.	No. of applicants.	Area in acres.	Value of timber recovered.
Applications pending disposal at the close of last year	487	1,791	71,631	Rs. a. p.
Applications received during the year	973	2,081	1,38,027	...
Total	1,460	4,472	2,09,658	...
Applications sanctioned in Protected Forests	2	2	62	2 8 0
Applications sanctioned in Open Forests	971	2,679	1,37,965	1,00,032 11 2
Applications rejected after inspection	206	332	39,314	...
Total number of applications disposed of during the year	1,179	3,018	1,77,341	1,00,035 3 2
Balance pending disposal at the close of the year	907	2,114	92,354	...

83. During the year a revised Forest Act, revised Grazing Rules and revised Free Grant Rules were drafted, but had not been passed by the close of the year.

84. There is no regular sanctioned scale of establishment, and promotions are made from time to time, according to the length of service and work of the officers concerned; consequently promotion is irregular and the charges for establishment are constantly varying. A reorganization scheme is now under preparation and it is hoped that it will come into force by the end of 1324 Fasli.

85. The annual reports and returns were received very late from most of the Divisions, entailing much delay in drawing up this report; the dates of receipt of the last returns due from each division and the names of the responsible officers are given below:—

Name of Officer.	Date on which due.	1st Bahman	Month.	Days.
Mr. Gopal Krishan Rao	10th Dei 1324 Fasli
Mr. L. H. Somvay	2nd Bahman 1324 Fasli	1
Mr. F. C. Edwards	8th Bahman 1324 Fasli	7
Mr. Mirza Mahomed Ali	15th Bahman 1324 Fasli	14
Mr. Ghose Mohiuddin	9th Farwardi 1324 Fasli	...	2	8
Mr. G. S. Borday	16th Farwardi 1324 Fasli	...	2	14
Mr. Ahmed Mohiuddin	29th Farwardi 1324 Fasli	..	2	28
Mr. Mirza Abbas Beg	do	..	2	28
Mr. B. O. Farroll	26th Ardebehist 1324 Fasli..	3		25
Mr. Abdul Bahim Shareef	9th Khurdad 1324 Fasli	..	4	8

F. A. LODGE,

HYDERABAD, DECCAN,

Dated 3rd May 1915.

CONSERVATOR OF FORESTS,

H. H. the Nizam's Dominions.
